# EVENT FINDER WITH NAVIGATION SYSTEM
## AND DISPLAY METHOD THEREOF

### Abstract of the Disclosure

An event finder on a remote terminal for finding events such as movies, sports, weather, news and the like through a remote terminal such as a lap top computer, personal digital assistant (PDA) and vehicle navigation system with positioning capability. The event finder includes a display, a data terminal connected to the display for processing data, a navigation system for determining position of a user and a destination, and a transceiver for receiving event data from an event data server through a communication system. The data terminal associates the event data from the event data server with position information from the navigation system and retrieves event information based on a selection method specified by the user.
